**CERTIFICATION OF EVALUATION**  
**for**  
**RANDOM NUMBER GENERATOR & ASSOCIATED COMPONENTS**  
(Selective component evaluation)

Random Number Generator

The pseudo random number generator (pRNG) and scaling algorithms used to generate results for the online games are components of the Global Game Internusa B.V system. The Global Game Internusa B.V RNG is used for the determination of the online game results. The RNG and related components have been evaluated by Gaming Associates (**ga**) for compliance with remote technical standards for the jurisdiction of Curacao.

The evaluation comprising statistical testing and code inspection found that:

- ♣ the RNG generated results that were uniformly distributed and statistically independent; and
- ♣ the scaled data for generating results of the online games was fair and not predictable.

The Global Game Internusa B.V RNG software has been fingerprinted to enable ongoing verification that the RNG in use is identical to the RNG evaluated.

Disclaimer

Gaming Associates has conducted a level of evaluation, which has historically been adequate for a limited component evaluation of this type. However, inherent in testing in laboratory environment is the unavoidable limitation of it not being possible to verify the effects of all possible configurations that occur at the actual site.
